

CRUSADER COOKING SYSTEM

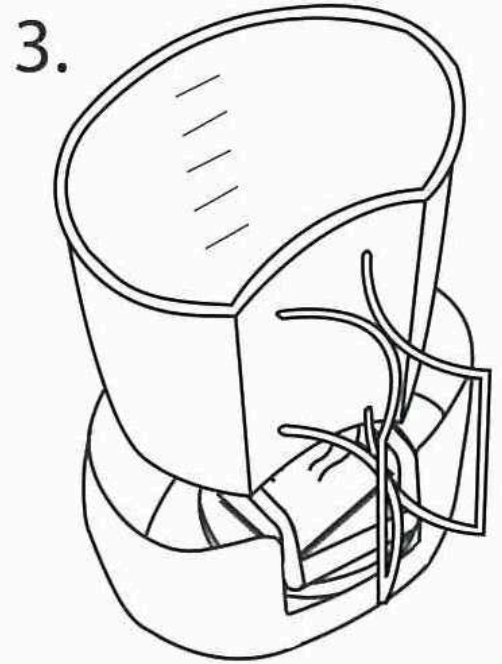

Instructions for use

1. Place the cooker section on a firm, steady surface, and place the fuel into the bottom of the cooker. Make sure the fuel is not stacked too high.

2. Taking care not to burn your hand, ignite the fuel, then fold the handle of the cooker over the flame to form a cooking platform.

3. Add the liquid or food to be heated to the cup section, then place onto the cooker. For best efficiency, do not overfill the cup.

Care of the Crusader cooking system

- Take care not to scratch the inner non-stick surface.
- Do not allow to boil dry.
- Always check the system has completely cooled, then clean the system well before packing it away.
- The cooker is designed to maximise air-flow, and in high winds flames can be drawn up the sides of the cup. Always take care with open flames and hot liquids.
