## CANTEEN CUP STAND

Use stand when heating water and meal ready to eat pouches in canteen cup.

Put water and pouch in cup.

Place stand on ground with side opening at bottom and put filled cup on top.

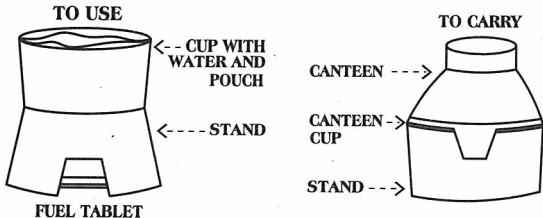

Insert fuel, compressed trioxane through side opening.

Follow directions on fuel tablet package.

Allow stand and cup to cool before touching.

Invert stand after use. Slip cup inside stand and canteen inside cup. Invert into canteen cover.

**WARNING:** Do not touch stand or cup immediately after heating. Do not place stand in a direct flame. Use fuel tablet in accordance with package directions.
